**DETAILED ACTION**

- a. Claims 1-13, 17 and 19-25 are pending in this Office Action. Claims 1, 11-12 and 23-25 are independent claims.

***Terminal Disclaimer***

The terminal disclaimer filed on 1/7/2008 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of co-pending applications 10/721,898 and 10/721,426 (issue as U.S. Patent No. 7,225,302) has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Information Disclosure Statement***

The Information Disclosure Statement(s) received on February 27, 2008 is in compliance with provisions of 37 CFR 1.97. Accordingly, the Information Disclosure Statement(s) are being considered by the examiner.

***Allowable Subject Matter***

Claim 1-13, 17, and 19-25 are allowed over the prior of records.

The following is an Examiner's statement of reasons for allowance:

In the Office Action mailed November 21, 2007, claims 11 and 12 were noted as allowable if rewritten in independent form to include all of the limitations of the base claims and any intervening claims. In view of Applicant's amendment and terminal disclaimer submitted on January 7, 2008, overcomes the objections/rejections given in the last office action. Furthermore,

the prior art made of records does not teach or fairly suggest the combination of elements, as recited in independent claims 1 and 23-25. More specifically, the prior art of records does not specifically suggest wherein as argued and further amended by Applicant, among other limitations, the limitation of “an electronic data element accessible to at least one software program implementing one or more data-object replication processes and one or more software processes other than the one or more data-object replication processes”, “setting a shared lock on the electronic data element after the state of the identifier has been set to the first state; assigning the identifier to one or more data objects stored in a memory of the source system; processing, by one or more of the software processes other than the data-object replication processes, the one or more data objects assigned to the identifier while the identifier is set to the first state”, and “replicating, by the one or more data-object replication processes after the exclusive lock has been set on the electronic data element, the one or more processed data objects from the memory in the source system to a memory in the target system”.

However, none of the prior art of the record teaches or suggests, independently or in combination, the combination of claimed elements including the specific features recited by the independent claims as indicated above.

The dependent claims, being definite, further limiting, and fully enabled by the specification and are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
